

LIFT - TILT - TABLE

FAST AND PRECISE WORK - WELD IN AN ERGONOMICALLY RELAXED POSITION

ADVANTAGES

Welding or assembly of workpieces at a working height of 550 to 1050 mm.

Through electro-hydraulic height adjustment this welding table forms the basis for a comfortable and ergonomic workplace.

PROPERTIES

FÖRSTER welding tables are equipped with heavy-duty rails made of weld-spatter resistant special grey cast iron (GG) or a non-ferritic alloy (Al/Cu).

The rails can be removed individually to open the table surface. This means that even bulky welding assemblies can be clamped comfortably.

Point loads up to 1.5 t, area loads up to 2.0 t as well as a surface evenness of ± 0.05 mm characterise our welding tables.

In addition, the work surface can be inclined up to 45° in both directions.

Highest quality, Made in Germany!
