

POSIZIONATORE DI ROTAZIONE-ALZATA-INCLINAZIONE DI FÖRSTER

LAVORO RAPIDO E PRECISO - ESTREMAMENTE FLESSIBILE E INTUITIVO GRAZIE AL SISTEMA DI ROTAIE VARIABILI

VANTAGGI

La regolazione continua dell'altezza e dell'inclinazione e la funzione di rotazione consentono di portare i gruppi in una posizione di lavoro ergonomica.

PROPRIETÀ

Grazie alle loro caratteristiche, i posizionatori FÖRSTER costituiscono la base ideale per la lavorazione dei vostri pezzi.

Oltre alle tre dimensioni di libertà, sono progettati per carichi elevati al fine di posizionare pezzi pesanti.

Capacità di carico fino a 200.000 N e coppie fino a 20.000 Nm, oltre a un movimento di rotazione regolabile da 0,04 a 1,6 giri/min tramite pedale, supportano il montaggio, la lavorazione o la saldatura.

MODELLI

Tutti i modelli possono essere personalizzati con i nostri sistemi di guide per ottenere una superficie di serraggio più ampia.

Massima qualità, Made in Germany!
